

CyberScale have extensive experience in designing and delivering business focused Cyber and Information Security training and workshops for many types and sizes of organisation.

Training courses and workshops can be delivered as public or in-house courses and can be tailored to your individual organisation as required. All content is written and delivered by our experienced and qualified Security Consultants and all sessions include exercises and group discussions to maximise interaction and retention. Examples of some of our current active short courses and workshops are shown below.

Cyber Security for Business Owners & Leaders

Almost half of all organisations in the UK fall victim to cyber security breaches every year, often leading to personal data breaches, interruption to business, financial loss and reputational damage. This non-technical course is designed to help business owners and leaders understand the key elements of Cyber and Information Security related risks and the practical steps required for a comprehensive Cyber Security strategy appropriate to their business. The course focuses on:

- Understanding Cyber Security from a business perspective
- Understanding relevant regulations and laws
- Key risks and business implications
- Common mistakes
- Planning your Cyber Security Strategy – Key Steps

Preparing for Cyber Essentials Accreditation

Cyber Essentials is a Government-backed, industry supported scheme to help organisations protect themselves against common online threats. Support from other industries include the Federation of Small Businesses, the CBI and a number of insurance organisations which are offering incentives for businesses.

The UK Government requires all suppliers bidding for contracts involving the handling of certain sensitive and personal information to be certified against the Cyber Essentials scheme. This course is aimed at enabling businesses who wish to pursue a Cyber Essentials accreditation using internal staff resources to prepare. The course focuses on:

- Background and Benefits of Cyber Essentials
- Key elements of Cyber Essentials
- How Cyber Essentials is assessed
- Assessing your readiness
- Building an implementation plan

Cyber Security Staff Awareness

Staff awareness of Cyber Security and related threats is a key element of a successful Cyber Security strategy. This half-day interactive awareness workshop will help non-technical team members understand the risks posed by Cyber criminals and other risks both at work and at home and help them protect themselves and your organisation. The course focuses on:

- What is Cyber Security?
- Why is it important?
- Protecting yourself at work and home.
- Key types of Cyber attack
